These colleagues have no financial background, but still need to understand what the information tries to tell them. In this regard the workshop of Mr. Abdul Rahim Finance for Non-Finance Executives was very helpful to me and gave me certain ideas how to explain financial information in an easy way to the Non-Finance Managers of our company. I can recommend this training for all employees, who have to deal with financial information and do not feel comfortable to analyze, interpret and use the same for their business decision.
